**DETAILED ACTION**

***Election/Restrictions***

1. This application contains claims directed to the following patentably distinct species:

Species I as shown in Figures 1-5.

Species II as shown in Figures 6(a)-7.

Species III as shown in Figures 8(a)-9.

Species IV as shown in Figures 10(a)-11.

The species are independent or distinct because the flexible substrate storage equipment and distinct from each other.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claims appear to be generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after

Art Unit: 3728

the election, applicant must indicate which are readable upon the elected species.

MPEP § 809.02(a).

2. During a telephone conversation with applicant's attorney Mr. Burnam on April 14, 2006 a provisional election was made with traverse to prosecute the invention of species I, claims 1-6 and 21-26. Affirmation of this election must be made by applicant in replying to this Office action. Claims 7-20 are withdrawn from further consideration by the examiner, 37 CFR 1.142(b), as being drawn to a non-elected invention.

3. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

### ***Drawings***

4. Figures 15(a), 15(b), 16 and 17 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). Corrected drawings in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

***Claim Rejections - 35 USC § 102***

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

6. Claims 1-6 and 21-26 are rejected under 35 U.S.C. 102(b) as being anticipated by Condie (5,236,094). Condie '094 discloses a flexible substrate storage equipment comprising: at least a pair of opposed members (vertical elements 306 and 308, lower horizontal frame elements 310 and 320 and upper horizontal frame elements 312 and 322) that constitute an outer frame of a storage equipment main body, wherein said pair of opposed members are disposed so as to maintain a predetermined interval to wedge a plurality of flexible substrates (thin circuit boards or wiring panels 4) in between to hold them in a shape of a curve. See Figures 7-15 embodiments and column 8, lines 46-60.

With respect to claims 3-5, noted the holding elements (400 and 430) in Figures 10-12 embodiments and see column 10, lines 21-47.

***Conclusion***

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Shown are flexible substrate storage equipment analogous to applicant's instant invention.
